01 About Me

✎ EDIT MODE

Sheikh Moniruz Zaman

I am a postgraduate student of Physics, specialising in High Energy Physics, at IIT Patna — one of India's premier institutions. My academic journey is driven by a deep curiosity about the fundamental forces that govern the cosmos, from particle interactions to the very fabric of spacetime.

Beyond the laboratory, I serve as a freelance linguistic expert, bridging cultures and ideas through the precision of language. Words, much like equations, carry the weight of meaning — and I wield both with equal devotion.

I am also a poet, writer, and author — finding in literature what physics often cannot express: the ineffable human experience. My works explore the intersection of science, philosophy, and emotion.
